

AI-Enabled Student Admissions & Support Management System

Project Documentation

Salesforce CRM & Agentforce AI Implementation

Acknowledgement

I would like to express my sincere gratitude to SmartBridge and the mentors of this internship program for providing the opportunity, guidance, and platform to design and build this project. I am thankful for the structured curriculum on Salesforce CRM and Agentforce AI that made it possible to conceptualize and complete the AI-Enabled Student Admissions & Support Management System.

I also extend my thanks to my institution and peers for their continuous support and encouragement throughout the course of this internship.

Abstract

Educational institutes today largely depend on spreadsheets and disconnected systems to manage student admissions, which leads to data duplication, lack of visibility, security risks, and delayed approvals. The AI-Enabled Student Admissions & Support Management System addresses these challenges by providing a centralized Salesforce application that manages student information, course offerings, enrollments, approvals, communication, and reporting.

The project was implemented entirely using Salesforce Admin (declarative) tools, without custom Apex development, and includes a full data model of standard and custom objects, field- and record-level security, validation rules, an automated approval process for high-discount enrollments, email templates and alerts, record-triggered and scheduled Flows, and a Screen Flow enrollment wizard.

Agentforce was introduced to add AI capabilities: prompt templates for application summaries and risk analysis, and an Admissions Assistant Agent that helps counselors and managers summarize applications, assess enrollment risk, and receive approval recommendations. The solution was deployed using Salesforce deployment best practices and supported by structured user training, resulting in faster application processing, better prioritization of high-value applicants, and more consistent, AI-informed decision-making.

8. Project Documentation

1. Project Overview

The AI-Enabled Student Admissions & Support Management System is a centralized Salesforce application designed to streamline and enhance student admissions using AI-driven intelligence and automation.

The system enables:

- AI-based student application prioritization
- Intelligent admission and discount recommendations
- Risk identification for enrollments
- Real-time alerts for high-priority applications
- Centralized visibility into admission performance

2. Objectives

- Provide an AI-assisted platform for efficient student admissions
- Automate prioritization, approval, and follow-ups using Flows and Agentforce
- Reduce manual effort and subjective decision-making
- Ensure secure, role-based access for counselors, managers, and admins
- Improve admission efficiency, accuracy, and student experience

3. Phase 1: Requirement Analysis and Planning

3.1 Understanding Business Requirements

The Student Admissions & Support Portal is designed to solve common challenges faced by training institutes and educational organizations. These organizations need a centralized system to manage student information, course offerings, enrollments, approvals, communication, and reporting, while also leveraging AI to reduce manual effort and improve decision-making.

Currently, most institutes rely on spreadsheets or disconnected systems to track students and courses. This leads to data duplication, lack of visibility, security risks, and delayed approvals. Salesforce is chosen as the CRM platform because it provides a secure, scalable, multi-tenant architecture with built-in automation and AI capabilities through Agentforce.

The business requires:

- Centralized student and course management
- Controlled access based on user roles
- Automated enrollment and approval processes
- Real-time reports and dashboards
- AI-powered assistance for counselors and admins

3.2 Defining Project Scope and Objectives

Project Scope

The scope of this project includes building a complete Salesforce application using Admin tools and Agentforce, without custom Apex development. The application will support the end-to-end lifecycle of student admissions and support.

Objectives

- Implement Salesforce CRM fundamentals in a real-world scenario
- Design a scalable data model using standard and custom objects
- Apply security at org, object, field, and record levels
- Automate business processes using Flows and Approval Processes
- Enable reporting and dashboards for decision-making
- Introduce Agentforce for AI-driven insights and assistance

4. Phase 2: Salesforce Development – Backend & Configuration

Milestone 1: Salesforce Account

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster.

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Milestone 2: Objects Creation

Activity 1: Creating Course Object

- From the Setup page, click on Object Manager
- Click on Create >> Custom Object
- Enter the Label name as Course
- Enter Plural Label name as Courses
- Enter Record Name as Course Name
- Select Data Type Text
- Select Allow Reports
- Select Allow Search
- Enable Track Field History
- Click on Save and New

Activity 2: Creating Student Enrollment Object

- From the Setup page, click on Object Manager
- Click on Create >> Custom Object
- Enter the Label name as Student Enrollment
- Enter Plural Label name as Student Enrollments
- Enter Record Name as Student Enrollment ID
- Select Data Type as Auto Number: SE-{0000}, Starting with 1
- Select Allow Reports
- Select Allow Search
- Enable Track Field History
- Click on Save

Milestone 3: Tabs

Activity 1: Creating a tab for Course Object

- Go to the setup page, type Tabs in Quick Find bar
- Click on Tabs, then click New (under custom object tab)
- Select Object (Course) and select the tab style
- Click Next (Add to Profiles page, keep default), Next (Add to Custom App, uncheck include tab)
- Ensure 'Append tab to the user's existing personal customizations' is checked
- Click Save

Activity 2: Creating a tab for Student Enrollment Object

- Go to the setup page, type Tabs in Quick Find bar
- Click on Tabs, then click New (under custom object tab)
- Select Object (Student Enrollment) and select the tab style
- Click Next (Add to Profiles page, keep default), Next (Add to Custom App, uncheck include tab)
- Ensure 'Append tab to the user's existing personal customizations' is checked
- Click Save

Milestone 4: Fields & Relationships

The table below defines the custom and standard fields configured on each object.

Object	Field Name	Data Type	Required
Contact	Student ID	Auto Number S-{0000} Starting Number-1	Yes
Contact	Education Level	Picklist (Graduate, UG, Diploma)	Yes
Contact	Student Status	Picklist (New, Enrolled, Completed)	Yes

Opportunity	Admission Stage	Picklist (Inquiry, Applied, Enrolled)	Yes
Opportunity	Expected Start Date	Date	Yes
Opportunity	Payment Status	Picklist (Pending, Paid, Partial)	Yes
Opportunity	Counselor Assigned	Lookup (User)	Yes
Opportunity	Total Course Fee	Currency	Yes
Course__c	Course Code	Text	Yes
Course__c	Course Category	Picklist (Technical, Non Technical)	Yes
Course__c	Course Fee	Currency	Yes
Course__c	Course Duration	Number	Yes
Course__c	Course Status	Picklist (Active, Inactive)	Yes
Course__c	Capacity	Number	Yes
Student_Enrollment__c	Student	Master-Detail (Contact)	Yes
Student_Enrollment__c	Course	Master-Detail (Course)	Yes
Student_Enrollment__c	Enrollment Date	Date	Yes
Student_Enrollment__c	Discount Percentage	Percent	Yes
Student_Enrollment__c	Final Payable Amount	Formula (Currency): Course__r.Course_Fee__c * (1 - (Discount__c / 100))	Yes
Student_Enrollment__c	Enrollment Status	Picklist (Draft, Pending Approval, Approved)	Yes
Student_Enrollment__c	Approval Status	Picklist (Pending, Approved, Rejected)	Yes
Student_Enrollment__c	Payment Status	Picklist (Paid, Pending)	Yes

Activity 1: Creation of Picklist field for Contact object

- Go to Setup, click on Object Manager
- Type object name Contact in the Quick Find box, click on Contact
- Click on Fields & Relationships, click on New
- Select Data Type as Picklist and click Next
- Enter the Field Label as Education Level
- Click on Enter values and enter: Graduation, UG, Diploma
- Click Next, Next, and Save

Activity 2: Creation of Lookup field for Opportunity Object

- Go to the Setup page, click on Object Manager, type Opportunity in the quick find bar, click on the Opportunity object
- Click on Fields & Relationships, click on New

- Select 'Lookup Relationship' as data type and click Next
- Select the related object 'User'
- Click Next, give Field Label as 'Counselor Assigned'
- Click Next, Next, Next, Save

Note: Create the remaining fields from the Fields table above for each object, choosing the correct data types carefully.

Milestone 5: Validation Rules

Activity 1: Validation Rule on Course Object

- Go to Setup, Object Manager, search Course, click on the Course object
- Click Validation Rules, click New
- Rule Name: Course Fee Validation; Active: checked
- Error Condition Formula: `Course_Fee__c <= 0`
- Error Message: 'Course Fee must be greater than zero'
- Error Location: Top of the page; Click Save

Activity 2: Validation Rule on Opportunity Object

- Go to Setup, Object Manager, search Opportunity, click on the Opportunity object
- Click Validation Rules, click New
- Rule Name: Start Date Validation; Active: checked
- Error Condition Formula: `Expected_Start_Date < TODAY()`
- Error Message: 'Expected Start Date cannot be in the past.'
- Error Location: Top of the page; Click Save

Activity 3: Validation Rule on Student Enrollment Object

- Go to Setup, Object Manager, search Student Enrollment, click on the object
- Click Validation Rules, click New
- Rule Name: Discount Percent Validation; Active: checked
- Error Condition Formula: `Discount_Percentage__c > 50`
- Error Message: 'Discount cannot be greater than 50%'
- Error Location: Top of the page; Click Save

Milestone 6: Approval Process

Note: Before implementing the Approval Process, ensure Profiles (Admin, Counselor, Manager), Role Hierarchy, and Users are completed. This approval process ensures that student enrollments with high discounts are reviewed and approved by a manager, preventing revenue loss and enforcing business policies.

Activity 1: Create Classic Email Template for Approval Notification

Field values used for this template:

- Folder: Unfiled Public Email Templates
- Email Template Name: High-Discount Enrollment Approval Notification
- Encoding: UTF-8
- Subject: Student Enrollment Awaiting Discount Approval
- Email Body: Includes merge fields for Student Name, Course Name, Course Fee, Discount Percentage, Final Payable Amount, and Enrollment Status, addressed to the enrollment owner and signed 'AI-Enabled Student Admissions System'

Create the Approval Process

Step 1 – Basic Settings:

- Name: High-Discount Student Enrollment Approval; Unique Name auto-fills; click Next

Step 2 – Specify Entry Criteria:

- Criteria are met: Discount Percentage greater than 30
- AND Enrollment Status equals Submitted for Approval; click Next

Step 3 – Select Approver:

- Automatically assign to approver(s): Manager of Record Owner
- Record Editability: Administrators ONLY can edit records during the approval process; click Next

Step 4 – Email Template Selection:

- Select High-Discount Enrollment Approval Notification; click Next

Step 5 – Select Fields to Display on Approval Page Layout:

- Student Name, Course Name, Discount Percentage, Final Payable Amount, Enrollment Status; click Next

Step 6 – Specify Initial Submitters:

- Add Record Owner to Selected Submitters (allows counselors to submit enrollments); click Save

Step 7 – Final Approval Actions:

- Add Field Update: Name 'Set Enrollment Status to Approved'; Field to Update: Enrollment_Status__c; New Value: Approved

Step 8 – Final Rejection Actions:

- Add Field Update: Name 'Set Enrollment Status to Rejected'; Field to Update: Enrollment_Status__c; New Value: Rejected

Step 9 – Create an Approval Step:

- Name/Unique Name: Step1; Step Number: 1; select 'All records should enter this step'; click Next

Step 10 – Activate the Approval Process:

- Open the Approval Process Detail Page and click Activate

Milestone 7: Email Templates

Activity 1: High Priority Student Application Notification

- Purpose: Notify the Counselor when a student application is identified as high priority by AI
- Go to Setup > Email Templates > Classic Email Templates > New Template > Text (Plain text)
- Template Name: High Priority Student Application Notification
- Subject: High-Priority Student Application Assigned to You
- Body includes: Student Name, Course Applied, AI Priority Score, Enrollment Date, and a call to contact the student within 24 hours
- Click Save

Activity 2: High Discount Student Enrollment Approval

- Purpose: Notify the Manager when a high-discount enrollment is submitted for approval
- Go to Setup > Email Templates > Classic Email Templates > New Template > Text (Plain text)
- Template Name: High Discount Student Enrollment Approval Notification
- Subject: Student Enrollment Awaiting Discount Approval
- Body includes: Student Name, Course Name, Course Fee, Discount Percentage, Final Payable Amount
- Click Save

Activity 3: Student Enrollment Approval Outcome Notification

- Purpose: Notify the Counselor when a student enrollment is approved or rejected
- Go to Setup > Email Templates > Classic Email Templates > New Template > Text (Plain text)
- Template Name: Student Enrollment Approval Status Notification
- Subject: Student Enrollment Approval Decision
- Body includes: Student Name, Course Name, Approval Status, Final Payable Amount
- Click Save

Milestone 8: Email Alerts

Activity 1: High Priority Lead Email Alert

- Search Email Alerts in Quick Find, click Continue, click New Email Alert
- Description: High Priority Student Application Email Alert
- Object: Student Enrollment
- Email Template: High Priority Student Application Notification
- Recipient Type: User – Student Enrollment Owner
- Click Save

Activity 2: High Discount Student Enrollment Approval Email Alert

- Search Email Alerts in Quick Find, click Continue, click New Email Alert
- Description: High Discount Enrollment Approval Email Alert
- Object: Student Enrollment
- Email Template: High Discount Student Enrollment Approval Notification
- Recipient Type: User – Manager
- Click Save

Activity 3: Student Enrollment Approval Status Email Alert

- Search Email Alerts in Quick Find, click Continue, click New Email Alert
- Description: Student Enrollment Approval Status Email Alert
- Object: Student_Enrollment__c
- Email Template: Student Enrollment Approval Status Notification
- Recipient Type: User – Enrollment Owner (Counselor)
- Click Save

Milestone 9: Declarative Automation (Flows)

Activity 1: Record-Triggered Flow – High Priority Student Application Notification

- Objective: Automatically notify the Counselor when AI_Priority_Score__c $\geq$ 80
- New Flow > Category: Triggered > Type: Record-Triggered Flow > Object: Student_Enrollment__c
- Trigger: When a record is created or updated
- Entry Condition: AI_Priority_Score__c Greater than or Equal to 80
- Optimize for Actions and Related Records
- Add Send Email Alert action: High Priority Student Application Email Alert
- Save and Activate the Flow

Activity 2: Record-Triggered Flow – High Discount Enrollment Submission for Approval

- Objective: Automatically submit an enrollment for approval when Discount__c > 30
- New Flow > Category: Triggered > Type: Record-Triggered Flow > Object: Student_Enrollment__c
- Trigger: When a record is created or updated
- Entry Condition: Discount__c Greater than 30
- Add Submit for Approval action: High Discount Student Enrollment Approval
- Save and Activate the Flow

Activity 3: Scheduled-Triggered Flow – Pending Enrollment Follow-Up

- Objective: Identify enrollments pending approval for more than 2 days and notify the counselor
- New Flow > Category: Triggered > Type: Scheduled-Triggered Flow

- Start Date/Time: e.g. Today, 9:00 AM; Frequency: Daily; Object: Student_Enrollment__c
- Conditions: Approval_Status__c Equals Pending AND LastModifiedDate Less than TODAY() – 2
- Add Send Email Alert action: Student Enrollment Approval Status Email Alert
- Save and Activate the Flow

Activity 4: Screen Flow – Student Enrollment Creation Wizard

- Objective: Provide a guided screen-based process for counselors to create enrollments
- New Flow > Category: Screen Flow
- Screen 1 'Student Details': Student, Course, Enrollment Date
- Screen 2 'Fee & Discount': Course Fee (Display), Discount
- Add Formula/Assignment to calculate Final Payable Amount
- Add Create Records element for Student_Enrollment__c
- Add Confirmation Screen: 'Enrollment Created Successfully'
- Save as 'Student Enrollment Screen Flow' and Activate

Milestone 10: Agentforce AI

Activity 1: Enable Agentforce & AI Trust Settings

- Go to Setup, search Agentforce, click Agentforce Setup, click Enable Agentforce
- Go to AI Trust & Permissions, enable Data Masking, Zero Data Retention, and Audit Logging
- Assign Agentforce access to System Administrator and Admissions Manager profiles
- Click Save

Activity 2: Create Prompt Template – Student Application Summary

- From Setup, search Prompt Builder, click New Prompt Template
- Prompt Type: Summary; Object: Student_Enrollment__c
- Prompt Name: Student Application Summary Prompt
- Prompt Content: Summarize student name, course applied, course fee and discount, final payable amount, enrollment status, and AI priority score, highlighting risks or special considerations
- Click Save and Activate

Activity 3: Create Prompt Template – Admission Risk Analysis

- Go to Prompt Builder, click New Prompt Template
- Prompt Type: Flex; Object: Student_Enrollment__c
- Prompt Name: Student Enrollment Risk Analysis Prompt
- Prompt Content: Analyze probability of successful admission, financial risk based on discount, overall enrollment health (Low/Medium/High Risk), and provide approval/rejection recommendations

- Click Save and Activate

Activity 4: Create Admissions AI Agent

- From Setup, search Agents, click New Agent
- Agent Name: Admissions Assistant Agent
- Description: AI agent to assist with student admissions and approvals
- Assign Topics: Student Application Summary, Enrollment Risk Analysis, Discount Approval Guidance
- Click Next

Activity 5: Configure Agent Actions

- Inside the Agent configuration, go to Actions
- Add Actions: Generate Student Application Summary, Analyze Enrollment Risk, Recommend Approval Decision
- Map each action to the corresponding Prompt Template
- Click Save

Activity 6: Configure Agent Data Library

- In Agent setup, click Data Library
- Add Objects: Student__c, Course__c, Student_Enrollment__c
- Set Access Level: Read Only; enable field-level access controls
- Click Save

Activity 7: Test the Agent

- Open a Student Enrollment record and launch the Admissions Assistant Agent
- Ask: 'Summarize this student application.'
- Ask: 'Is this enrollment safe to approve?'
- Ask: 'What risks are involved in this discount?'
- Verify the agent's response accuracy

Activity 8: Deploy Agentforce

- Go to Agent Deployment
- Deployment Type: Lightning Experience
- Assign to: Admissions Counselors and Admissions Managers
- Click Deploy

Milestone 11: The Lightning App

Activity 1: Create a Lightning App for 'AI-Enabled Student Admission System'

- From Setup, enter App Manager in Quick Find, select App Manager
- Click New Lightning App

- App Name: AI-Enabled Student Admissions & Support Management System; upload a related image; click Next
- Under App Options, leave default selections and click Next
- Under Utility Items, leave as is and click Next
- From Available Items, select Account, Contact, Student_Enrollment__c, Course__c, Opportunity, move to Selected Items, click Next
- From Available Profiles, select System Administrator and move to Selected Profiles
- Click Save & Finish

Milestone 12: Editing of Page Layouts

Activity 1: Edit Page Layout in Student_Enrollment__c Object

- Setup > Object Manager > Student_Enrollment__c > Page Layouts
- Click Student Enrollment Layout, arrange fields as needed, click Save

Activity 2: Edit Page Layout in Course__c Object

- Setup > Object Manager > Course > Page Layouts
- Click Course Layout, arrange fields as needed, click Save

Activity 3: Edit Page Layout in Account Object

- Setup > Object Manager > Account > Page Layouts
- Click Account Layout, arrange fields as needed, click Save

Activity 4: Edit Page Layout in Opportunity Object

- Setup > Object Manager > Opportunity > Page Layouts
- Click Opportunity Layout, arrange fields as needed, click Save

Activity 5: Edit Page Layout in Contact Object

- Setup > Object Manager > Contact > Page Layouts
- Click Contact Layout, arrange fields as needed, click Save

Milestone 13: Dynamic Forms

Activity 1: Create a Dynamic Form in AI Recommendation Object

- Open the AI-Enabled Student Admissions & Support Management System App, open Student Enrollment tab, create and save a new record
- Open the record, click the Gear icon, select Edit Page
- Click the Details section, click Upgrade Now to enable Dynamic Forms
- Select Student Enrollment Page Layout and click Finish
- Click Save, then Activate
- Set as Org Default for Desktop and Phone, click Next, click Save
- Repeat for the remaining objects

Milestone 14: Users

A user is anyone who logs in to Salesforce. Users represent people involved in the system, such as loan applicants, loan officers, loan managers, and administrators, who need access to records and related data. Each user account identifies the user, and its settings determine what features, objects, and records the user can access based on role and profile.

Activity 1: Create Admission Counselor User

- Note: Complete Profiles and Roles milestones first
- Setup > Users > New User
- First Name: Admission; Last Name: Counselor; Alias: e.g. acoun
- Email Id: personal email; Username: unique, in text@text.text format; Nick Name: any
- Role: Admission Counselor; User License: Salesforce; Profile: Admission Counselor Profile
- Click Save

Activity 2: Creating Other Users

- Repeat the same steps using Role: Admission Manager
- User License: Salesforce
- Profile: Admission Manager Profile

Milestone 15: Duplicate and Matching Rules

This milestone ensures data integrity in the system by preventing duplicate Student (Contact) records and duplicate Student Enrollment records using Matching Rules and Duplicate Rules. Accurate, clean admission data is critical for reliable AI priority scoring, correct risk and eligibility analysis, meaningful Agentforce recommendations, and accurate enrollment approvals and reporting.

Activity 1: Custom Matching Rule for Student (Contact)

- Setup > Matching Rules > New Rule > Object: Contact > Next
- Rule Name: Unique Student – Email & Phone
- Matching Criteria: Email (Exact), Phone (Exact); check Match Blank Fields
- Click Next, then Save & Activate

Activity 2: Duplicate Rule for Student (Contact)

- Setup > Duplicate Rules > New Rule > Object: Contact
- Rule Name: Unique Student Email and Phone
- Action on Create/Edit: Allow and Report
- Alert Text: 'Student Email and Phone Number must be unique.'
- Add Rule: Unique Student – Email & Phone; Save & Activate

Activity 3: Custom Matching Rule for Student Enrollment

- Setup > Matching Rules > New Rule > Object: Student_Enrollment__c > Next
- Rule Name: Unique Enrollment – Student & Course
- Matching Criteria: Student__c (Exact), Course__c (Exact); check Match Blank Fields
- Click Next, then Save & Activate

Activity 4: Duplicate Rule for Student Enrollment

- Setup > Duplicate Rules > New Rule > Object: Student_Enrollment__c
- Rule Name: Unique Student Course Enrollment
- Action on Create/Edit: Allow and Report
- Alert Text: 'This student is already enrolled in the selected course.'
- Add Rule: Unique Enrollment – Student & Course; Save & Activate

Milestone 16: Profiles

A profile is a group/collection of settings and permissions that define what a user can do in Salesforce. It controls object permissions, field permissions, user permissions, tab settings, app settings, Apex class access, Visualforce page access, page layouts, record types, login hours, and login IP ranges. Profiles are typically defined by job function.

Standard Profiles

Salesforce provides these by default and they cannot be deleted: Contract Manager, Read Only, Marketing User, Solutions Manager, Standard User, and System Administrator. Each includes a default set of permissions for standard objects.

Custom Profiles

Custom profiles are defined by the organization and can be deleted if no users are assigned to them.

Activity 1: Admission Counselor Profile Creation

- Objective: Provide controlled access to Leads, Opportunities, AI insights, and activities for daily operations
- Setup > Profiles > clone Standard User > name it Admission Counselor Profile > Save
- Edit the profile; set the default app to the AI-Enabled Student Admissions & Support Management System
- Custom Object Permissions: Read/Create/Edit on Contact (Student), Student_Enrollment__c, Course__c, and Task
- Read-Only access to Reports and Dashboards
- Set Session Timeout to 2 hours of inactivity
- AI & Agentforce Access: Read access to AI Priority Score and Risk Level fields; no approval or override permissions
- Password Policies: expire in 90 days; minimum length 8; click Save

Activity 2: Admission Manager Profile Creation

- Setup > Profiles > clone Standard User Profile > name it Admission Manager Profile > Save

Milestone 17: Roles & Role Hierarchy

A role in Salesforce defines a user's record-level data visibility, controlling who can see whose records in the organization hierarchy. In this system, roles ensure Admission Counselors see only their assigned students and enrollments, Admission Managers can see all team records, and student data access remains secure and structured.

Role Hierarchy Used: Admission Counselor reports up to Admission Manager.

Activity 1: Creation of Admission Manager Role

- Quick Find > Roles > Set Up Roles
- Click Expand All, click Add Role under CEO
- Label: Admission Manager; Role Name auto-populated
- Click Save

Activity 2: Creation of Admission Counselor Role

- Quick Find > Roles > Set Up Roles
- Click the + (Add Role) under Admission Manager
- Label: Admission Counselor; Role Name auto-populated
- Click Save

5. Deployment

The Deployment, User Training & Adoption phase focuses on rolling out the AI-Enabled Student Admissions & Support Management System into a production-ready environment, ensuring users are well-trained, AI features are effectively adopted, and the system delivers measurable academic and operational value.

This phase ensures that Admission Counselors, Admission Managers, and System Administrators can confidently use AI-powered insights and Agentforce recommendations to prioritize high-value student applications, make informed admission and discount decisions, improve enrollment efficiency, and deliver better student engagement and support.

5.1 Deployment Strategy

The system was deployed following Salesforce best practices to ensure system stability, data security, and minimal disruption to ongoing admission activities.

Deployment Steps Followed

- Validated all Flows, Approval Processes, Email Alerts, Agentforce configurations, and custom metadata in the sandbox

- Ensured required test coverage for any Apex components (if applicable)
- Performed final regression testing on student application creation, AI priority identification, high-discount enrollment approvals, and email notifications/reminders
- Deployed components using Change Sets / Metadata Deployment: Custom Objects (Student_Enrollment__c); Custom Fields (AI Priority Score, Discount %, Approval Status, Risk Level); Flows (Record-Triggered, Scheduled, Screen Flows); Approval Processes; Email Templates and Alerts; Lightning Apps, Pages, and Dynamic Forms; Agentforce configurations (Agents, Prompts, Data Library)
- Validated deployment in Production using sample student and enrollment records

5.2 User Training & Enablement

User training was critical to ensure successful adoption of AI-driven admissions workflows. Target users: Admission Counselor, Admission Manager, and System Administrator.

Training Topics – Admission Counselors

- Understanding AI Priority Scores
- Identifying high-priority student applications
- Using AI insights on Student Enrollment record pages
- Submitting enrollments for approval
- Managing follow-ups using tasks and reminders

Training Topics – Admission Managers

- Reviewing high-discount enrollment requests
- Interpreting AI risk analysis and recommendations
- Making approval decisions using AI summaries
- Monitoring team workload and enrollment trends

Training Topics – System Administrators

- Managing Agentforce agents and prompt templates
- Monitoring flows, approvals, and email alerts
- Updating AI thresholds and business rules
- Troubleshooting automation and security issues

Training Methods

- Live demonstration sessions
- Scenario-based walkthroughs
- Hands-on practice using sample admission data
- Q&A and feedback session

5.3 User Adoption & Change Management

To encourage adoption, the system was designed to seamlessly integrate AI insights into daily admission workflows.

Adoption Strategies

- Embedded AI and Agentforce components directly on the Home Page, Student Enrollment Record Page, and Lightning App
- Minimal learning curve by leveraging standard Salesforce UI
- Clear labels and descriptions for AI-generated insights
- Automated AI recommendations to reduce manual decision-making

6. Monitoring & Post-Deployment Support

After deployment, continuous monitoring was implemented to ensure system reliability and user satisfaction.

Monitoring Activities

- Tracked usage of AI priority and recommendations
- Monitored enrollment conversion rates
- Reviewed approval turnaround times
- Checked performance of flows and scheduled automations

Support Activities

- Addressed user queries and feedback
- Fine-tuned AI priority thresholds based on real data
- Improved UI labels and help text
- Enhanced AI recommendation clarity and relevance

7. Business Impact & Outcomes

The successful deployment of the AI-Enabled Student Admissions & Support Management System resulted in:

- Faster student application processing
- Better focus on high-priority applicants
- Reduced manual effort for admission analysis
- Improved approval efficiency
- Better decision-making using AI-driven insights
- Increased productivity of admission teams

8. Project Documentation

Project documentation for the AI-Enabled Student Admissions & Support Management System serves as a comprehensive reference capturing business objectives, AI-driven design and Agentforce usage, automation logic (Flows & Approvals), data model and security configuration, and deployment readiness.

The documentation ensures that student admission requirements—such as application prioritization, discount approval, AI-assisted decision-making, enrollment tracking, and performance monitoring—are clearly defined and accurately mapped to Salesforce capabilities.

Documentation Benefits

- Acts as a blueprint for administrators and future enhancements
- Supports user onboarding, training, troubleshooting, and maintenance
- Documents all objects and relationships, Flows and Approval Processes, Email Templates and Alerts, Agentforce Agents and Prompt Templates, and Security configurations
- Assists in audit readiness, governance, and knowledge transfer
- Ensures long-term scalability and sustainability of the solution
